

EXECUTIVE SUMMARY

The control center behind a marketplace people trust.

Approve partners, oversee every booking and payment, protect quality and privacy — from one modern web dashboard.

automated API tests

AT A GLANCE

HomeServices Admin is the web control center of the platform. Staff review and approve companies and independents, browse every client, worker and booking, follow payments and platform earnings, and keep an eye on reviews — in English or German, on desktop or phone.

It is built on Next.js with a backend-for-frontend: sessions live in httpOnly cookies, access is limited to the admin role, and banking data is never returned by the admin API. It is part of one platform together with the client app and the partner app, and is covered by 34 automated integration tests.

THE PROBLEM

- ✗ New partners are checked by e-mail and spreadsheet
- ✗ Problems with bookings surface only when customers complain
- ✗ Gross volume, fees and payouts are spread across tools
- ✗ Banking and personal data are a compliance risk

OUR SOLUTION

- ✓ Approval workflow: approve, reject or suspend with one click
- ✓ One view of every booking with status, client, provider and price
- ✓ Platform earnings and gross volume at a glance
- ✓ Banking data encrypted and never shown, even to admins

Vision: run a trusted marketplace with a small, efficient team — and add an AI copilot that reads documents, flags anomalies and answers questions about the data, always with a human decision.

THE PRODUCT

Every part of the platform, under control

- 
Overview
 Clients, companies, independents, workers; bookings by state; platform earnings; recent bookings.
- 
Approvals & onboarding
 Application queue, business details, approve / reject / suspend, activity per partner.
- 
People directory
 Companies, independents, workers and clients — searchable with status and activity.
- 
Bookings oversight
 Every booking from request to completion with address, services, pricing and payment.
- 
Payments & revenue
 Payment records, gross volume vs. the 12% fee, provider net amounts.
- 
Reviews & quality
 All client reviews with rating, provider and booking — spot problems early.

HOW IT WORKS

- 1

Partner applies
 Company or independent submits business details
- 2

Admin reviews
 Approve, reject or suspend with one click
- 3

Platform runs
 Bookings, payments and reviews flow in
- 4

Oversee & improve
 Monitor KPIs, resolve issues, grow quality

TRUST, SECURITY & QUALITY

- 
Admin-only access
 Server-side route gate; only the admin role can sign in and call admin endpoints.
- 
Tokens stay off the browser
 Backend-for-frontend keeps tokens in httpOnly cookies — page scripts cannot read them.
- 
No banking data exposed
 IBAN, BIC and bank are encrypted at rest (AES-256-GCM) and shown only as "Confidential".

BUSINESS MODEL

12% of every completed booking

The console makes the revenue — a fixed 12% share of each completed booking — visible and auditable, and lets a small team govern many partners.

€88 → provider

€12

Example: €100 booking. Prices shown gross incl. 19% VAT; the fee appears as its own line.

MARKET

1.04 M

registered craft businesses

5.6 M

people employed

€771 bn

annual turnover

342 k

apprentices

Germany, 2024. Source: ZDH, "Wirtschaftlicher Stellenwert des Handwerks 2024" (zdh.de); turnover excl. VAT. ≈ 5 people per business on average — too small to build their own booking, dispatch and payment stack.

AI VISION · ROADMAP

- ✓ Onboarding checks: read documents, validate VAT IDs, flag inconsistencies
- ✓ Fraud and anomaly alerts on cancellations, prices, duplicate accounts
- ✓ Review moderation and per-partner feedback summaries
- ✓ Ask your data in plain language; supply and demand forecasts

ROADMAP

Built today: admin dashboard with approvals, directory, bookings, payments, reviews; EN/DE; responsive.

- > Audit log of every admin action
- > Document upload and verification in approvals
- > Finance and support roles with scoped permissions
- > Production hosting, CI/CD, monitoring; analytics exports

ONE PLATFORM · FIVE WINNERS

Clients

Problem: Slow search, opaque prices, stressful emergencies.

Answer: Verified providers, upfront prices, 24/7 SOS, chat, reviews.

Companies

Problem: Dispatch by phone, no overview of jobs, team and earnings.

Answer: One dashboard: jobs, assignment, workload, net earnings.

Coworkers

Problem: Unclear schedules, paper reports, no view of earnings.

Answer: Personal schedule, own jobs only, own earnings.

Independents

Problem: Great craft, no time for marketing and admin.

Answer: Bookings come to them; schedule and earnings in one app.

Platform admin

Problem: Quality and trust break without visibility.

Answer: Approvals, account control, booking and revenue oversight.

Run a marketplace with confidence.

We are looking for pilot operators, investors and compliance partners. A live, click-through demo of the working product is available on request.
