AT A GLANCE

HomeServices Business is the partner app of the HomeServices platform. It turns bookings coming from the client app into managed jobs and gives every kind of service business the tools it needs: **company managers** get a dashboard with earnings, alerts, dispatch, team and job control; **coworkers** see their own schedule, jobs and earnings; **independent professionals** run their solo business in the same app.

The partner app talks to the same secure backend as the client app: real bookings, workers, assignments, job reports, status updates and notifications. Access is enforced by role on the server, and payout details are always shown as "Confidential".

THE PROBLEM

- ✗ Jobs arrive by phone, WhatsApp and e-mail — and get lost
- ✗ No live view of who does what or what is unassigned
- ✗ Coworkers lack a clear schedule and see no earnings
- ✗ Independents have no time for marketing, quotes and admin

OUR SOLUTION

- ✓ Every booking arrives in the app with client, address, time, price
- ✓ Unassigned-jobs alert, one-tap assignment, instant notification
- ✓ Personal schedule, own jobs and earnings for every coworker
- ✓ Solo mode: a bookable profile, schedule and earnings

Vision: give every service business the software of a big company — dispatch, scheduling, quoting and invoicing in one mobile app, with an AI layer that takes over the admin.

THE PRODUCT

One app, three roles

Company manager

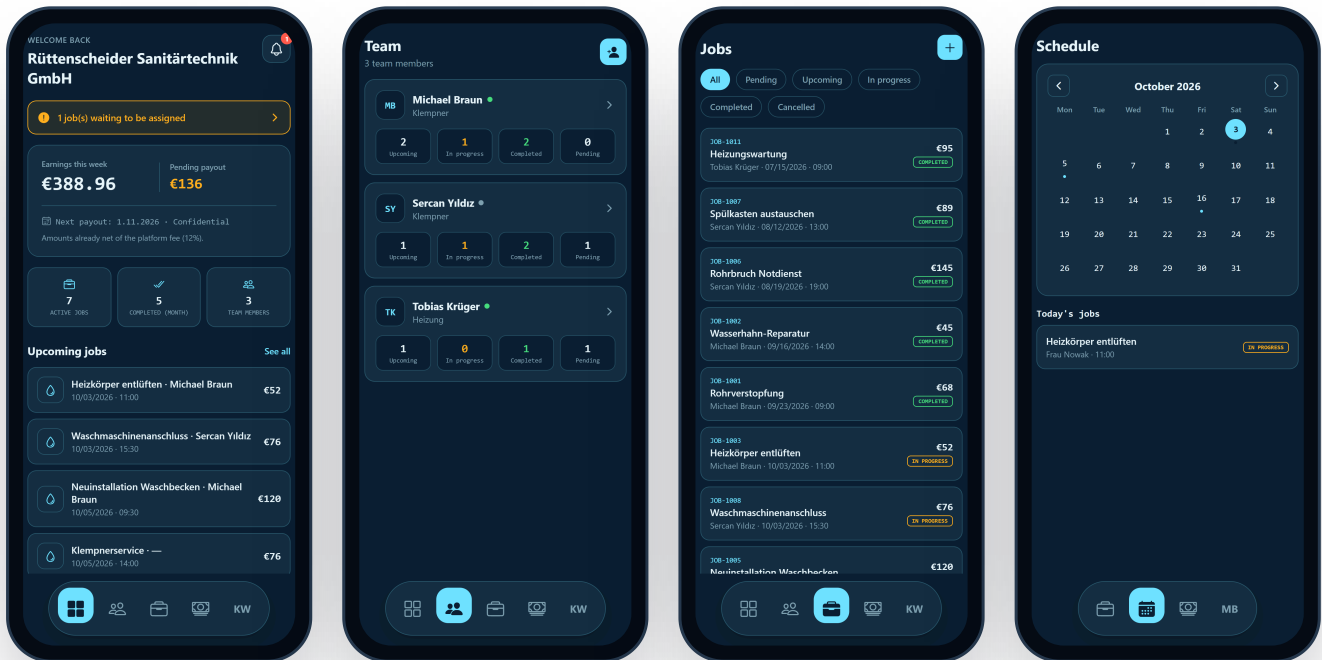

- Dashboard**
Earnings this week, pending payout, active jobs, team size, unassigned alert.
- Dispatch & jobs**
Assign, reschedule, cancel; filter by status; full job detail with client and price.
- Team & earnings**
Workload per member, add/remove coworkers; revenue by category, fees, team ranking.

Coworker

- Own schedule**
Monthly calendar and today's jobs; only the jobs assigned to them.
- Job work**
Client, address, time and price; status updates and job reports.
- Earnings & availability**
Per-job earnings with totals and averages; availability switch for managers.

Independent

- Bookable profile**
Appears next to established companies in the client app.
- Schedule & earnings**
The same tools as larger partners, without team overhead.
- Confidential data**
Tax and payout details captured once and kept private.

HOW IT WORKS

1

Apply & get approved

Register as company or independent; admin reviews

2

Receive bookings

Clients book; manager is notified instantly

3

Assign & deliver

Coworker is notified, works the job, reports

4

Get paid transparently

Net amounts, fees and earnings visible

TRUST, SECURITY & QUALITY

Vetted onboarding

Applications go through admin review (draft → pending → approved) before partners can take bookings.

Payout data protected

Bank details encrypted at rest (AES-256-GCM) and shown as "Confidential" — never exposed to clients or admins.

Role-based access

Managers, coworkers and independents each get only the data and actions that match their role.

BUSINESS MODEL

12% of every completed booking

Partners pay only when they earn: 12% of each completed booking, with net amounts shown everywhere. No booking, no fee — and no paid leads or advertising.

€88 → provider

€12

Example: €100 booking. Prices shown gross incl. 19% VAT; the fee appears as its own line.

MARKET

1.04 M

registered craft businesses

5.6 M

people employed

€771 bn

annual turnover

342 k

apprentices

Germany, 2024. Source: ZDH, "Wirtschaftlicher Stellenwert des Handwerks 2024" (zdh.de); turnover excl. VAT. ≈ 5 people per business on average — too small to build their own booking, dispatch and payment stack.

AI VISION · ROADMAP

- ✓ Smart dispatch and route optimisation by skills, location and availability
- ✓ Quote and scope assistant from the client's description and photos
- ✓ Voice job reports and auto-drafted invoices
- ✓ Demand and pricing insights; idle-capacity alerts

ROADMAP

Built today: partner app with manager, coworker and independent views; secure API; notifications.

- Partner registration connected end-to-end with document upload
- Real push notifications and app-store release
- Independent-provider job flow in the app
- Invoices with VAT, calendar sync, hosting, CI/CD, monitoring

ONE PLATFORM · FIVE WINNERS

🏠 Clients

Problem: Slow search, opaque prices, stressful emergencies.

Answer: Verified providers, upfront prices, 24/7 SOS, chat, reviews.

🏢 Companies

Problem: Dispatch by phone, no overview of jobs, team and earnings.

Answer: One dashboard: jobs, assignment, workload, net earnings.

👷 Coworkers

Problem: Unclear schedules, paper reports, no view of earnings.

Answer: Personal schedule, own jobs only, own earnings.

🔑 Independents

Problem: Great craft, no time for marketing and admin.

Answer: Bookings come to them; schedule and earnings in one app.

🛡️ Platform admin

Problem: Quality and trust break without visibility.

Answer: Approvals, account control, booking and revenue oversight.

Become a founding partner.

We are looking for founding partner companies and independents, investors and industry partners. A live, click-through demo of the working product is available on request.
