

PITCH DECK · PARTNER APP

Run your whole service business from one app.

Bookings, dispatch, team, schedule and earnings — for companies, their coworkers and independent professionals.

Company manager

Coworker

Independent

English · Deutsch

Great craftspeople are forced to be dispatchers, accountants and marketers.

Company managers

- ✗ Jobs arrive by phone, WhatsApp and e-mail — and get lost
- ✗ No live picture of who is doing what, or what is still unassigned
- ✗ Earnings and fees are unclear until the books are done
- ✗ Winning new customers means paying for ads and portals

Coworkers

- ✗ Schedules change by phone call or a note on the van
- ✗ Job details (address, contact, price) are scattered
- ✗ Paper or ad-hoc reports after every job
- ✗ No transparent view of what they have earned

Independents

- ✗ Excellent at the trade, no time for marketing
- ✗ Quotes, bookings and payments handled by hand
- ✗ No professional online presence or booking page
- ✗ Admin and tax details spread across tools

— OUR ANSWER

One app. Three roles. Each sees exactly what they need.

Company manager

Full access

- ✓ Dashboard with earnings, pending payout and alerts
- ✓ Assign, reschedule and follow every job
- ✓ Manage the team and see each member's workload
- ✓ Revenue by category, team comparison, company profile

Coworker

Own jobs only

- ✓ Personal schedule and assigned jobs
- ✓ Job details: client, address, time, price
- ✓ Status updates and job reports
- ✓ Own earnings and availability switch

Independent professional

Solo mode

- ✓ Own profile and a bookable presence for clients
- ✓ Schedule and earnings in the same app
- ✓ Tax and payout details kept confidential
- ✓ No team overhead — just the work

Access is enforced by role on the server, not just hidden in the interface.

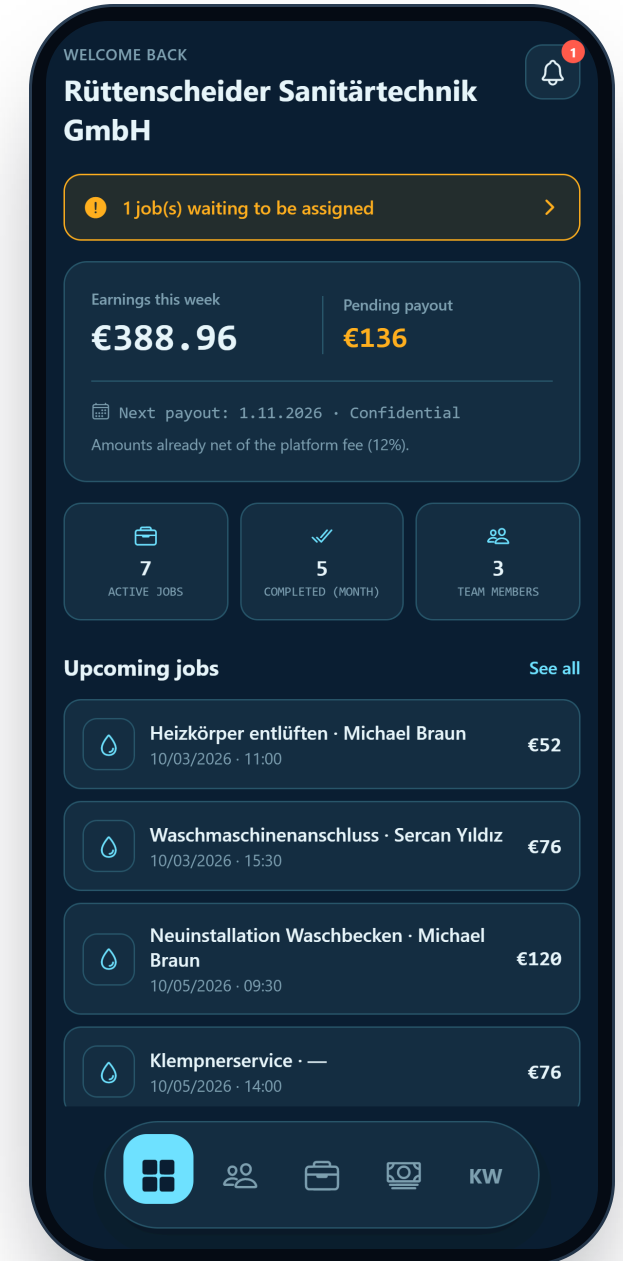

The whole business at a glance.

- ✓ **Earnings this week** and pending payout — already net of the 12% platform fee
- ✓ **Alert for unassigned jobs** so no booking waits for an answer
- ✓ **Live counters:** active jobs, completed this month, team size
- ✓ **Upcoming jobs** with the assigned team member, time and price
- ✓ **Payout details stay confidential** in the interface

NET EARNINGS

88%

of every booking value reaches the provider

From booking to assigned coworker — automatically.

1

Client books

Booking arrives from the client app

2

Manager notified

Push + in-app notification, alert on dashboard

3

Assign

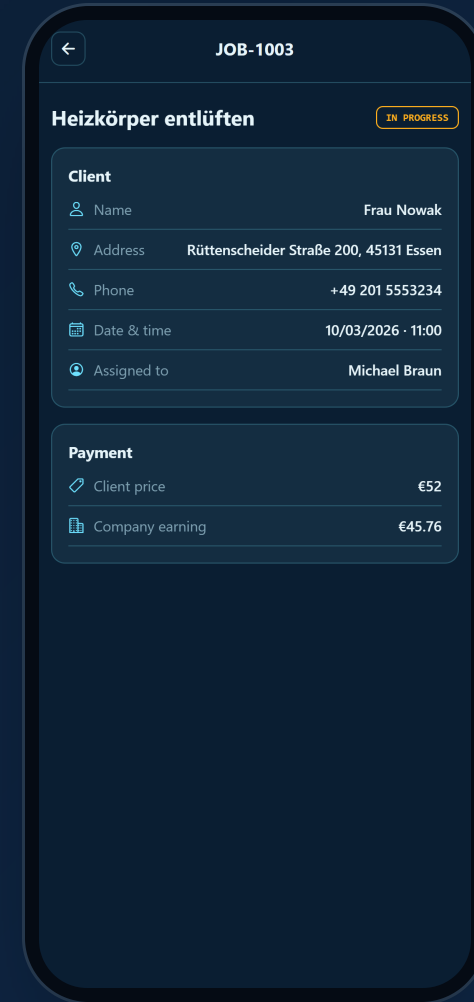

Pick a coworker with one tap

4

Coworker notified

Job lands in their schedule

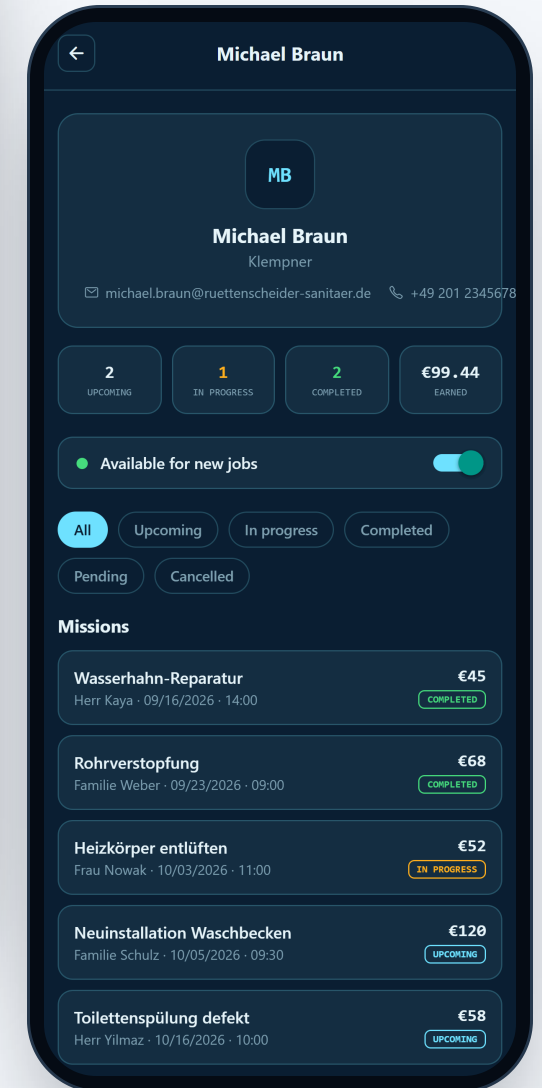

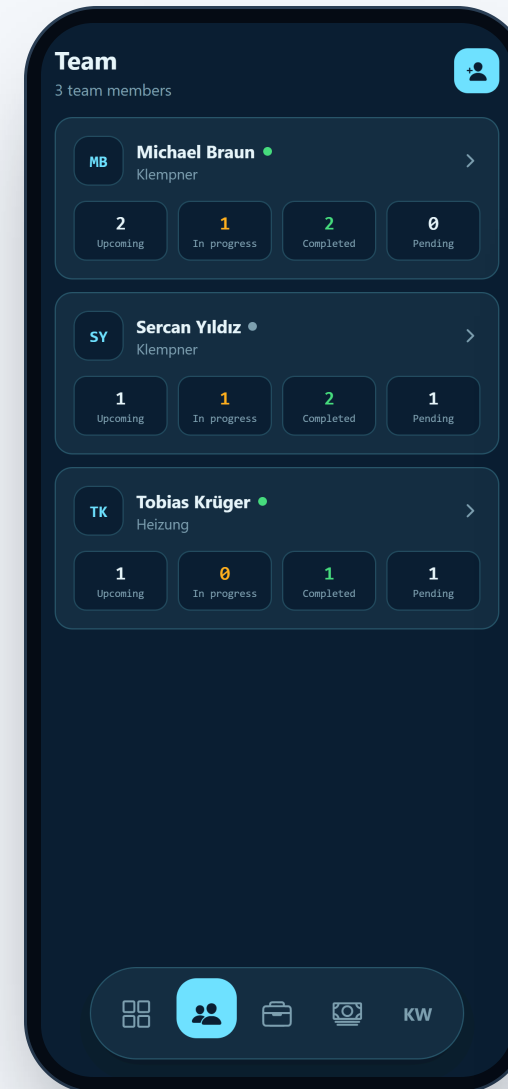

- ✓ **Unassigned jobs** are listed in one place with price, client and time
- ✓ **Full job detail** for managers: client, address, phone, assignee, client price and company earning
- ✓ **Reschedule and cancel** with the same status model the client sees

— FOR THE COMPANY MANAGER · TEAM

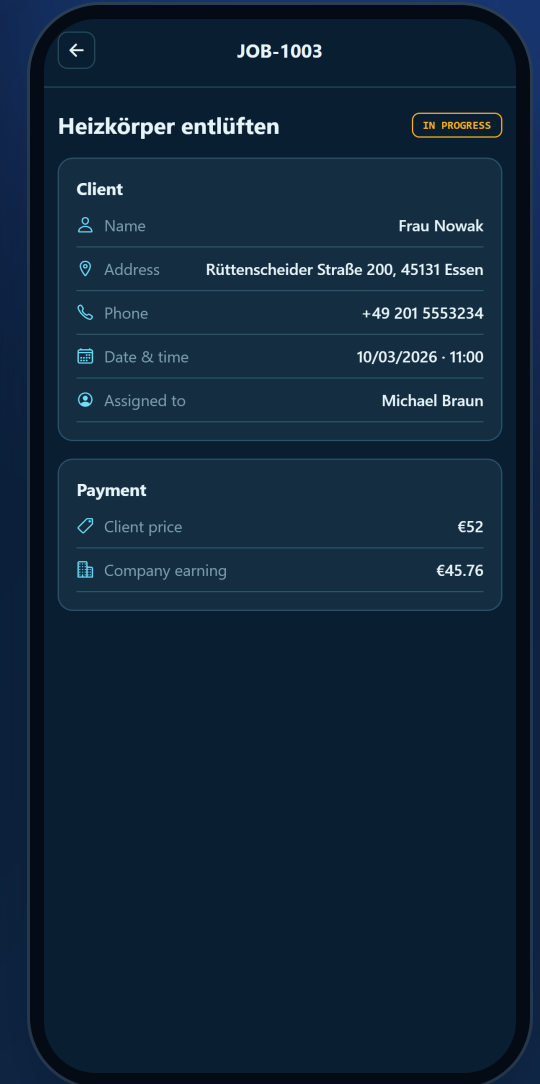

Know your team's workload — instantly.

- ✓ **Every team member** with trade, upcoming, in-progress, completed and pending jobs
- ✓ **Member profile:** contact details, jobs, earnings and availability
- ✓ **Add or remove coworkers** directly in the app
- ✓ **Fair, data-based dispatching** — see who has capacity before assigning

Every job, every status, one filter away.

- ✓ **All jobs** across the company with status filters: pending, upcoming, in progress, completed, cancelled
- ✓ **Job numbers** and clear status badges for quick scanning
- ✓ **Completion reports** from coworkers (materials used, remarks) attached to the job
- ✓ **Same lifecycle as the client** — everyone looks at one source of truth

Revenue, fees and team performance — clear.

- ✓ **Total revenue**, month-to-date and **platform fees paid** — nothing hidden
- ✓ **Revenue by service category** to see what the business is good at
- ✓ **Team comparison** ranking completed jobs and earnings per member
- ✓ **Net amounts** everywhere: what you see is what you receive

Company Profile

This information is confidential — visible only to you and our finance/compliance team. It is never shared with clients.

KW

— FOR COWORKERS

A clear day for every team member.

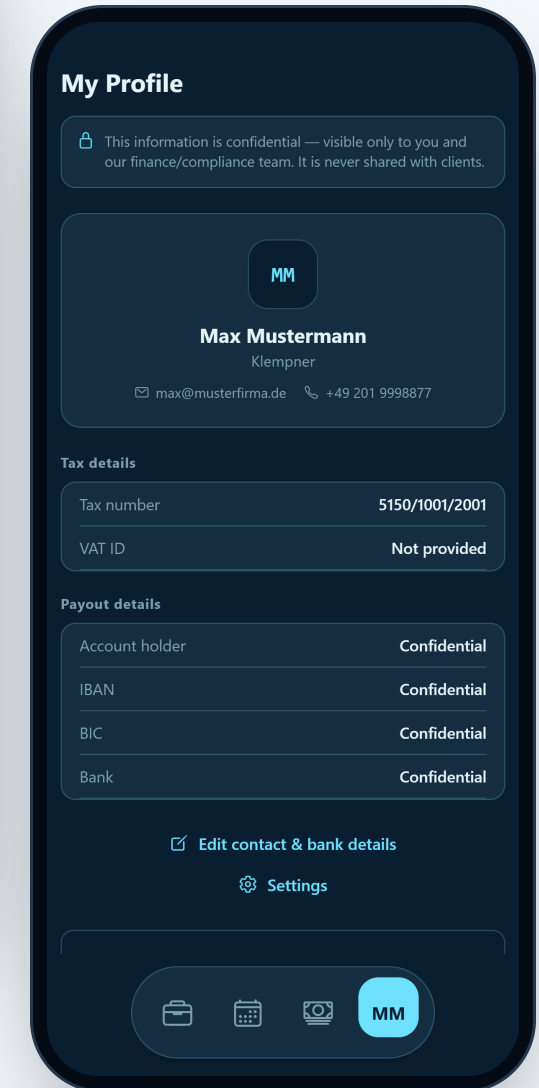

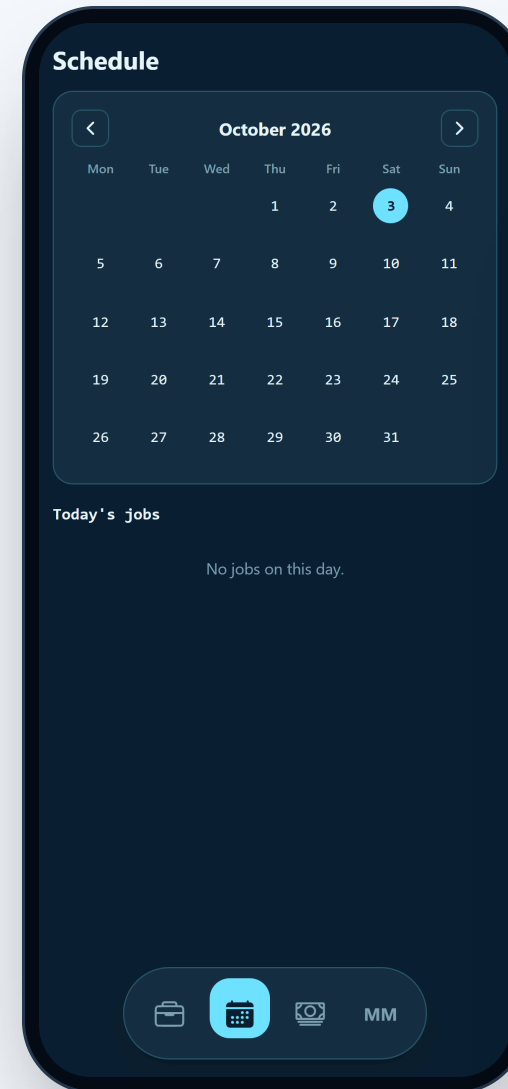

- ✓ **Own schedule** with a monthly calendar and today's jobs
- ✓ **Only their own jobs** — client, address, time and status
- ✓ **Availability switch** so managers know who can take more work
- ✓ **Transparent earnings** per job, with totals and averages
- ✓ **Privacy built in** — no access to company finances

— FOR INDEPENDENT PROFESSIONALS

Be your own company — without the overhead.

- ✓ **Get found and booked** by clients in the customer app alongside established companies
- ✓ **Schedule, earnings and profile** in the same app as larger partners
- ✓ **Tax and payout details** captured once and kept confidential
- ✓ **Grow into a company** later: same platform, same history, add a team when ready

Quality in, confidence out — every partner is reviewed.

1

Apply

Company or independent registers with legal, tax and business details

2

Admin review

Platform admin approves or rejects; status draft → pending → approved

3

Go live

Approved partners appear to clients and can receive bookings

4

Stay accountable

Reviews, job history and admin oversight keep standards high

Payout data protected

Bank details are encrypted at rest (AES-256-GCM), shown as “Confidential” in the app and never returned by the admin API.

Role-based access

Managers, coworkers and independents each get only the data and actions that match their role.

English & German

The partner app switches language from the very first screen — built for German teams and international staff.

We solve a real problem for **everyone** in the chain.

Clients

THE PROBLEM

Finding a reliable pro is slow, prices are opaque, emergencies are stressful.

OUR ANSWER

Verified providers, upfront prices, 24/7 emergency booking, chat, reviews.

Companies

THE PROBLEM

Dispatch by phone and WhatsApp, no overview of jobs, team and earnings.

OUR ANSWER

One dashboard: jobs, assignment, team workload, earnings after fees.

Coworkers

THE PROBLEM

Unclear schedules, paper reports, no view of what they earn.

OUR ANSWER

A personal schedule, only their own jobs, their own earnings — nothing more.

Independents

THE PROBLEM

Great craft, but no time for marketing, booking and admin.

OUR ANSWER

Bookings come to them; the same app runs the schedule, earnings and profile.

Platform admin

THE PROBLEM

Quality and trust break without governance and visibility.

OUR ANSWER

Approval workflow, account control, booking oversight, revenue view.

Every booking creates value for all five at once

BUSINESS MODEL

We earn when work gets done — 12% of every completed booking.

Partners pay only when they earn: a fixed 12% platform share of each completed booking. No booking, no fee — and the app shows net amounts so there are never surprises at payout.

HOW A €100 BOOKING SPLITS

Net to the company / independent

Platform fee

- ✓ **Performance-based:** no booking, no fee.
- ✓ **Transparent:** the fee is shown as its own line item, in every app.
- ✓ **Gross prices include 19% VAT** — what clients see is what they pay.

ILLUSTRATIVE SCALE MODEL — assumptions, not a forecast

STAGE	PARTNERS	JOBS / MO. EACH	Ø BOOKING	ANNUAL FEES
Pilot city	100	20	€120	€345,600
Regional	500	25	€130	€2.34 M
Multi-city	2,500	30	€140	€15.12 M

Annual fees = partners × jobs × 12 months × average booking × 12%. Illustrative arithmetic to show how the model scales — not a financial forecast. Ancillary streams (premium partner tools, B2B accounts, advertising) are not included.

— VALUE FOR PARTNERS

From “how we've always done it” to a business that runs itself.

BEFORE

Jobs by phone, WhatsApp and e-mail

Dispatch by memory and calls

Who is free? Who is busy?

Paper notes and verbal reports

Earnings known at month-end

Paying for leads and advertising

WITH HOMESERVICES BUSINESS

Every booking arrives in the app with client, address, time and price

Unassigned-jobs alert, one-tap assignment, instant coworker notification

Team workload and availability at a glance

Digital job reports attached to the booking

Net earnings, platform fees and revenue by category — live

Bookings flow in from the client app — you pay only on completed jobs

— THE MARKET

A giant, fragmented market that still runs on phone calls.

Germany's craft sector is the backbone of local home services — and most of it is organised in small, independent businesses with little digital infrastructure between them and their customers.

1.04 M

registered craft businesses in Germany

5.6 M

people employed in the craft sector

€771 bn

annual turnover (excl. VAT)

342 k

apprentices — the next generation of providers

≈ 5 people per business on average (5.6 M employees across 1.04 M businesses) — too small to build their own booking, dispatch and payment stack.

Our entry point: a regional launch in one metro area and ten everyday categories, expanding city by city.

Source: ZDH (Zentralverband des Deutschen Handwerks), "Wirtschaftlicher Stellenwert des Handwerks 2024" — zdh.de. Turnover excludes VAT.

Software that **thinks along** with your business.

The partner side is where AI creates the most measurable value: less admin, better utilisation, faster quotes. Assistants propose; the manager decides.

Smart dispatch

Suggest the best coworker per job by skills, location, availability and travel time — and optimise daily routes.

Quote & scope assistant

Turn the client's description and photos into a structured job brief and a draft quote.

Voice reports & invoices

Coworkers dictate the job report; the system drafts the report and the invoice.

Demand & pricing insights

Forecast busy periods, flag under-priced services and show where capacity is idle.

Why we can build it: the platform already stores job lifecycles, assignments, durations, categories and net earnings per partner — exactly the signals dispatch and pricing models need. Partner data stays private and is never shared with competitors.

A solid core today — a clear path to launch and scale.

DONE

Built today

- › Customer app (EN/DE/FR), partner app (EN/DE), admin dashboard (EN/DE)
- › Secure REST API, MySQL schema, role-based access
- › Booking lifecycle, notifications, chat, reviews
- › Emergency booking & relocation planner
- › 34 automated integration tests

LAUNCH READINESS

Next · 0–6 months

- › Partner registration connected end-to-end with document upload
- › Real push notifications (EAS) and store release
- › Independent-provider job flow in the app
- › Production hosting, CI/CD and monitoring

SCALE

Then · 6–12 months

- › Automatic invoices with VAT & payout statements
- › In-app quotes and calendar sync for partners
- › Review moderation & dispute handling
- › More cities and categories; analytics for partners

DIFFERENTIATE

Vision · 12–24 months

- › AI matching, scoping and dispatch
- › Premium partner tools & B2B accounts (property managers, housing)
- › Partner API and integrations
- › Expansion across DACH and the EU

Give every service business the software of a big company.

HomeServices Business turns phone calls and paperwork into a modern, mobile operating system for the trades — and it is already working end to end.

Founding partners

Companies and independents who want to shape the product and be first in their region.

Investors

Capital for launch, payments integration and the partner-side AI features.

Industry partners

Associations, wholesalers and insurers who serve the same businesses.

A live, click-through demo of the working product is available on request.
