transparent platform fee

34

automated API tests

## AT A GLANCE

**HomeServices** is a mobile marketplace that connects households with verified service professionals — companies and independents — for everyday jobs: plumbing, electrical, heating, cleaning, painting, carpentry, gardening, handyman work, IT/network and relocation. Clients discover providers, compare ratings and rates, pick a time slot, see the full price and follow the booking through to completion.

The client app is one of three products on a shared platform, together with the **partner app** (company managers, coworkers, independents) and the **admin dashboard**. It is a working product — a React Native (Expo) app on a secure REST API with a MySQL database and 34 automated integration tests — ready for its first launch region.

### THE PROBLEM

- ✗ Hard to know which provider is reliable and available
- ✗ Prices are unclear until the technician is at the door
- ✗ Emergencies mean frantic searching and calling
- ✗ Moving needs distance, crew, truck and insurance decisions

### OUR SOLUTION

- ✓ Admin-approved providers with ratings and reviews
- ✓ Full price incl. VAT and fee shown before confirming
- ✓ One-tap SOS finds the nearest available pro, 24/7
- ✓ Relocation planner recommends the right option and price

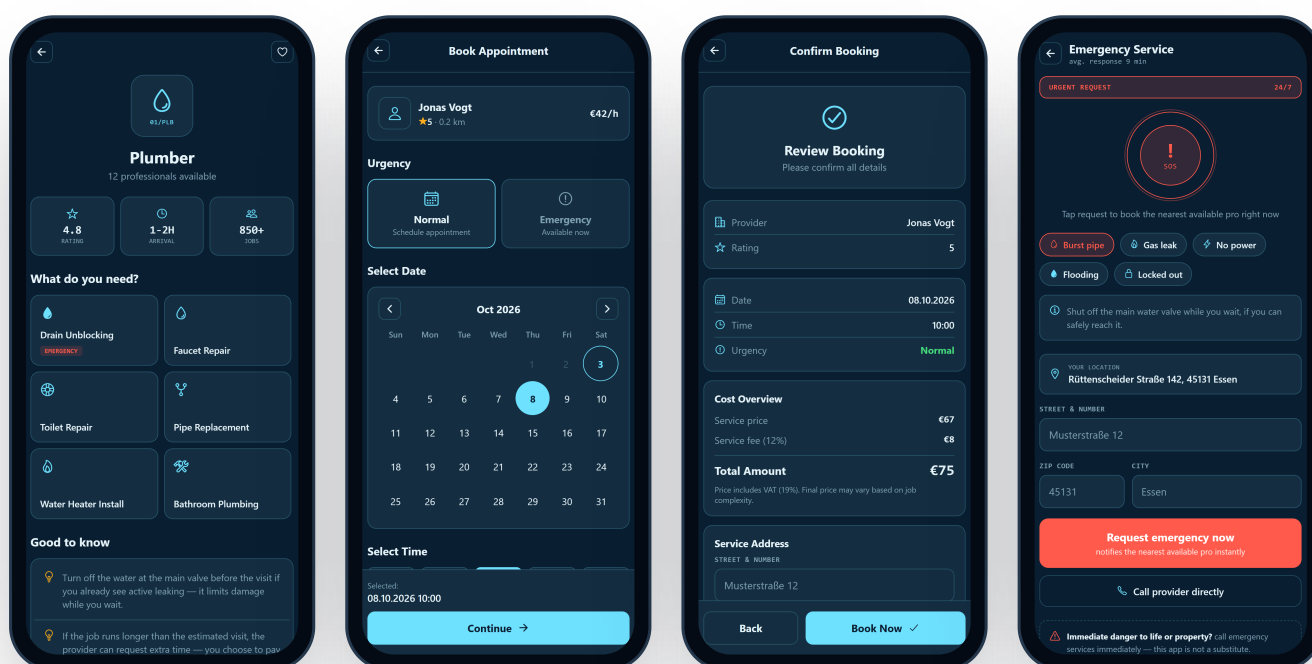

**Vision:** become the operating system for local home services — a trusted marketplace with an AI layer that matches, scopes and dispatches work, starting in one launch region and expanding across the DACH region and the EU.

## THE PRODUCT

# Everything a household needs, in one app

- 
**Discover & compare**  
 Ten categories; ratings, hourly rates, distance and services. Companies and independents side by side.
- 
**Book in minutes**  
 Pick a date and time slot, one-off or recurring, enter the address and see the full price breakdown.
- 
**Emergency SOS**  
 Burst pipe, gas leak, no power, flooding, lock-out: the nearest available pro is notified instantly.
- 
**Relocation planner**  
 City-to-city distance, a recommendation between a moving company and an independent helper, estimated prices.
- 
**Chat & notifications**  
 Stay in touch with the provider and get notified about every status change.
- 
**Three languages**  
 English, German and French from the very first screen; profile, favorites and payment methods.

## HOW IT WORKS

- Discover**  
 Browse ten categories or search by need
- Compare**  
 Ratings, rates, distance, availability
- Book**  
 Choose slot, add address, confirm price
- Follow & review**  
 Status, chat, then rate the job

## TRUST, SECURITY & QUALITY

- 
**Vetted partners**  
 Every company and independent is reviewed and approved by the platform admin before taking bookings.
- 
**Security & privacy**  
 Token-based sessions, role-based access, validated input; provider bank details encrypted (AES-256-GCM) and never exposed.
- 
**Quality loop**  
 Reviews tied to completed jobs, notifications and chat keep standards visible and accountable.

## BUSINESS MODEL

### 12% of every completed booking

Clients pay no subscription and see transparent prices. The platform earns a fixed share of each completed booking — so growth in value for clients is growth in revenue.

€88 → provider

€12

Example: €100 booking. Prices shown gross incl. 19% VAT; the fee appears as its own line.

## MARKET

**1.04 M**

registered craft businesses

**5.6 M**

people employed

**€771 bn**

annual turnover

**342 k**

apprentices

Germany, 2024. Source: ZDH, "Wirtschaftlicher Stellenwert des Handwerks 2024" (zdh.de); turnover excl. VAT. ≈ 5 people per business on average — too small to build their own booking, dispatch and payment stack.

## AI VISION · ROADMAP

- ✓ Describe it or snap a photo: AI suggests category, price range and best-fit pro
- ✓ Smart matching by availability, distance, ratings and price
- ✓ Conversational booking assistant in DE / EN / FR
- ✓ Relocation estimator from room photos or inventory

## ROADMAP

Built today: three apps, secure API, notifications, chat, reviews, emergency booking, relocation planner.

- > Live payments via a payment provider (e.g. Stripe Connect)
- > Real push notifications and app-store release
- > Live tracking, saved addresses; hosting, CI/CD, monitoring
- > Invoices with VAT, more cities and categories

## ONE PLATFORM · FIVE WINNERS

### 📱 Clients

**Problem:** Slow search, opaque prices, stressful emergencies.

**Answer:** Verified providers, upfront prices, 24/7 SOS, chat, reviews.

### 🏢 Companies

**Problem:** Dispatch by phone, no overview of jobs, team and earnings.

**Answer:** One dashboard: jobs, assignment, workload, net earnings.

### 👷 Coworkers

**Problem:** Unclear schedules, paper reports, no view of earnings.

**Answer:** Personal schedule, own jobs only, own earnings.

### 🔧 Independents

**Problem:** Great craft, no time for marketing and admin.

**Answer:** Bookings come to them; schedule and earnings in one app.

### 🛡️ Platform admin

**Problem:** Quality and trust break without visibility.

**Answer:** Approvals, account control, booking and revenue oversight.

## Let's bring it to its first city.

We are looking for pilot partners, investors and strategic partners. A live, click-through demo of the working product is available on request.
