

PITCH DECK · CLIENT APP

Every home service. One trusted app.

Book verified plumbers, electricians, cleaners, movers and more — with upfront prices, 24/7 emergency help and a relocation planner built in.

10 service categories

English · Deutsch · Français

24/7 emergency

— THE PROBLEM FOR CLIENTS

Getting something fixed at home shouldn't feel like a project.

Whether it is a dripping tap or a full relocation, most people still rely on recommendations, endless calls and guesswork.

Who can I trust?

No easy way to tell which providers are reliable, qualified and actually available this week.

What will it cost?

Prices are unclear until the technician is already at the door — and surprises follow.

Emergencies hit at the worst time

A burst pipe at night means frantic searching and calling while the damage grows.

Moving is a coordination maze

Distance, crew size, truck, insurance: customers have to figure out each piece alone.

Result

Lost time, lost trust and money spent on the wrong provider.

— OUR ANSWER

Find, book and pay a verified pro in a few taps.

HomeServices puts the whole journey — discovery, scheduling, pricing, chat and reviews — into one app clients genuinely enjoy using.

Trusted

Only providers approved by the platform admin can be booked. Ratings and reviews from real jobs.

Transparent

The full price — including VAT and the platform fee — is shown before you confirm.

Fast

Pick a slot, confirm, done. In an emergency the nearest available pro is notified instantly.

— THE JOURNEY

From “I need someone” to “it's done” in four simple steps.

1 Discover

Browse ten categories or search by need.

2 Compare

Ratings, rates, distance and availability.

3 Book

Pick a day and time slot, add the address.

4 Follow

Booking number, status and chat in one place.

— DISCOVER

Ten everyday services, one place to start.

- ✓ **Plumber, electrician, heating, cleaning, painter, carpenter, gardener, handyman, IT/network and relocation**
- ✓ **Provider profiles** with ratings, hourly rate, distance and the services they offer
- ✓ **Companies and independents** side by side — clients choose what suits the job
- ✓ **Nearby view** to find available pros around you

— BOOK & PAY

Clear prices. Real time slots. No surprises.

- ✓ **Pick a date and time slot** that fits your schedule
- ✓ **Full price breakdown** before confirming — gross price incl. 19% VAT, platform fee shown as its own line
- ✓ **One-off or recurring** services, including a flag for urgent jobs
- ✓ **Booking number** and status for every job, from pending to completed

— EMERGENCY SERVICE

When it can't wait, **one tap** finds the nearest pro.

- ✓ **SOS booking:** burst pipe, gas leak, no power, flooding or locked out
- ✓ **Nearest available provider** is notified instantly, with an estimated response time
- ✓ **Practical first aid** while you wait (e.g. how to shut off the water)
- ✓ **Safety first:** clear prompt to call emergency services when life or property is in danger

Why it matters: urgent jobs are the moments when trust in a platform is won — or lost.

Call provider directly

Immediate danger to life or property? call emergency services immediately — this app is not a substitute.

— RELOCATION PLANNER

Moving, planned like a pro — before the first call.

- ✓ **City-to-city planning** with a built-in list of German cities and an instant distance estimate
- ✓ **Smart recommendation:** over 150 km the app steers customers to a moving company
- ✓ **Honest options:** insured moving company vs. independent helper — with trade-offs spelled out
- ✓ **Estimated price** for each option, then straight into booking

— EVERYDAY COMPANION

Built for real life — in your language.

- ✓ **My bookings** — upcoming, in progress and completed, with real booking numbers
- ✓ **Messages & notifications** with the provider about every job
- ✓ **Favorites** and a clean profile to manage payment methods and settings
- ✓ **English, German and French** from the very first screen

Clients can relax — the platform does the vetting.

Vetted partners

Every company and independent goes through an application and admin review (draft → pending → approved) before they can take bookings.

Real reviews

Ratings and written reviews are tied to completed jobs, so quality is visible and accountable.

Privacy & security

Token-based sessions, role-based access, validated input. Provider bank details are encrypted at rest (AES-256-GCM) and never exposed to clients.

Always informed

Notifications for new bookings, assignments and status changes, plus in-app chat with the provider.

Engineering quality: a documented REST API with 34 automated integration tests covering authentication, bookings, notifications and the admin workflow.

We solve a real problem for **everyone** in the chain.

Clients

THE PROBLEM

Finding a reliable pro is slow, prices are opaque, emergencies are stressful.

OUR ANSWER

Verified providers, upfront prices, 24/7 emergency booking, chat, reviews.

Companies

THE PROBLEM

Dispatch by phone and WhatsApp, no overview of jobs, team and earnings.

OUR ANSWER

One dashboard: jobs, assignment, team workload, earnings after fees.

Coworkers

THE PROBLEM

Unclear schedules, paper reports, no view of what they earn.

OUR ANSWER

A personal schedule, only their own jobs, their own earnings — nothing more.

Independents

THE PROBLEM

Great craft, but no time for marketing, booking and admin.

OUR ANSWER

Bookings come to them; the same app runs the schedule, earnings and profile.

Platform admin

THE PROBLEM

Quality and trust break without governance and visibility.

OUR ANSWER

Approval workflow, account control, booking oversight, revenue view.

Every booking creates value for all five at once

We earn when work gets done — 12% of every completed booking.

For clients the app is simple and transparently priced. Revenue is a fixed 12% share of each completed booking — so the more value clients get, the more the platform earns.

HOW A €100 BOOKING SPLITS

Net to the company / independent

Platform fee

- ✓ **Performance-based:** no booking, no fee.
- ✓ **Transparent:** the fee is shown as its own line item, in every app.
- ✓ **Gross prices include 19% VAT** — what clients see is what they pay.

ILLUSTRATIVE SCALE MODEL — assumptions, not a forecast

STAGE	PARTNERS	JOBS / MO. EACH	Ø BOOKING	ANNUAL FEES
Pilot city	100	20	€120	€345,600
Regional	500	25	€130	€2.34 M
Multi-city	2,500	30	€140	€15.12 M

Annual fees = partners × jobs × 12 months × average booking × 12%. Illustrative arithmetic to show how the model scales — not a financial forecast. Ancillary streams (premium partner tools, B2B accounts, advertising) are not included.

— THE MARKET

A giant, fragmented market that still runs on phone calls.

Germany's craft sector is the backbone of local home services — and most of it is organised in small, independent businesses with little digital infrastructure between them and their customers.

1.04 M

registered craft businesses in Germany

5.6 M

people employed in the craft sector

€771 bn

annual turnover (excl. VAT)

342 k

apprentices — the next generation of providers

≈ 5 people per business on average (5.6 M employees across 1.04 M businesses) — too small to build their own booking, dispatch and payment stack.

Our entry point: a regional launch in one metro area and ten everyday categories, expanding city by city.

Source: ZDH (Zentralverband des Deutschen Handwerks), "Wirtschaftlicher Stellenwert des Handwerks 2024" — [zdh.de](https://www.zdh.de). Turnover excludes VAT.

From a booking platform to an **intelligent** home-services network.

AI is the next layer on top of a clean, structured booking core. For clients it will make every step faster and more accurate — while people stay in control.

Describe it or snap it

Describe the problem or upload a photo: AI suggests the right category, an indicative price range and the best-fit pro.

Smart matching

Ranking by availability, distance, ratings, price and past fit — not just a list.

Conversational assistant

Book, reschedule and get answers in German, English or French, by chat or voice.

Relocation estimator

Estimate volume, crew and truck size from room photos or an inventory list.

Why we can build it: every booking already yields structured data — categories, status events, ratings, locations and prices. Models run behind the existing API with human-in-the-loop controls and privacy by design (GDPR).

A solid core today — a clear path to launch and scale.

DONE

Built today

- › Customer app (EN/DE/FR), partner app (EN/DE), admin dashboard (EN/DE)
- › Secure REST API, MySQL schema, role-based access
- › Booking lifecycle, notifications, chat, reviews
- › Emergency booking & relocation planner
- › 34 automated integration tests

LAUNCH READINESS

Next · 0–6 months

- › Live payments through a payment provider (e.g. Stripe Connect)
- › Real push notifications & app-store release
- › Live provider tracking and saved addresses
- › Production hosting, CI/CD and monitoring

SCALE

Then · 6–12 months

- › Automatic invoices with VAT & payout statements
- › In-app quotes and calendar sync for partners
- › Review moderation & dispute handling
- › More cities and categories; analytics for partners

DIFFERENTIATE

Vision · 12–24 months

- › AI matching, scoping and dispatch
- › Premium partner tools & B2B accounts (property managers, housing)
- › Partner API and integrations
- › Expansion across DACH and the EU

Let's make home services as easy as booking a ride.

A working, tested product with a clear business model and a large, underserved market.
We are looking for partners to take it to its first city.

Pilot partners

Companies and independents who want to be first on the platform in a launch region.

Investors

Seed capital for launch, payments integration and the first AI features.

Strategic partners

Housing companies, insurers and retailers who need reliable service delivery.

A live, click-through demo of the working product is available on request.
